EDRS PRICE MF01/PC01 Plus Postage.
DESCRIPTORS *Animals; Ecology; Elementary Education; *Wildlife
IDENTIFIERS *Coloring Books; *Habitats

ABSTRACT

This coloring book provides illustrations of 18 animals in their habitats. Animals presented include: beavers; bears; bats; housecats; elephants; moose; tigers; geese; chimpanzees; rabbits; butterflies; giraffes; fish; kangaroos; gnus; bugs and bees; and humans. Two additional illustrations are provided which show that the sun and air are part of a habitat and that there is room in a habitat for animals to run and carry on their life functions. (JN)

HABITAT
is where it's at . . .

HABITAT is where an animal finds all the things it needs to live . . .

Food, Water, and Shelter: Sun, Air, and Room to move around—We call this its HABITAT.

HABITAT IS WHERE IT'S AT:

HABITAT IS WHERE IT'S AT:

Habitat
Is where it's at—
For Beaver
Bear—
Bass, or
Bat—
Even for your Pussycat—
All need Habitat.

Habitat is food for all:
Special food for Elephant
Or Moose—
Different foods for a Tiger
Or a Goose.

Habitat is shelter for all creatures:
For Chimpanzees
And Rabbits, small;
For Butterflys
And Giraffes tall.

Habitat is water too:
For Fish, of course,
and Kangaroo—
And even for the
Homely Gnu.

Habitat is Sun and Air,
And lots of room
For each to run
And do its thing.

Habitat
Is Where It's At—

For Bug and Bee

FOR YOU—FOR ME!
